Medical Director - Jacqueline Emery, MD

Gynecologic Cytology Report

Patient Name: **TEST, BARBARA**
SSN #: 234-56-7891
DOB/Age: 4/4/1967 (Age: 39)/F
Med. Rec. #: 877893-BT
Client: **Test Client**
Physician(s): Test Doctor, MD

Accession #: **P06-71**
Collection Date: 10/3/2006
Received Date: 10/4/2006

Clinical Information:

LMP: NG
DEPO-PROVERA
PREVIOUS ABN

SPECIMEN SOURCE:

A: LIQUID BASED CERVICAL/ENDOCERVICAL

SPECIMEN ADEQUACY:

SATISFACTORY FOR EVALUATION
An endocervical/transformation zone component is present.

INTERPRETATION:

HIGH GRADE SQUAMOUS INTRAEPITHELIAL LESION (Favor Moderate Dysplasia, CIN II).

RECOMMENDATIONS:

Colposcopy, biopsy and/or endocervical curettage as clinically indicated. If this patient undergoes a biopsy procedure, please send this lab a copy of the results of that report to help us ensure correlation between cytologic and histologic reports.

Electronically Signed Out by:
System Manager II

The Pap Test is not a diagnostic procedure and should not be used as the sole means to detect cervical cancer. It is only a screening process designed to aid in the detection of cervical cancer and its precursors. Both false-negative and false-positive results can occur, therefore any suspicious physical findings or clinical symptoms should be investigated as appropriate.
